

## WEEKLY RETURN

OF

 BIRTHS, DEATHS, AND MARRIAGES  
 IN EIGHT PRINCIPAL TOWNS OF  
 SCOTLAND.

By Authority of the Registrar-General.

No. 1.

WEEK ENDING SATURDAY, JANUARY 4, 1902.

The number of Deaths registered in Eight of the Principal Towns of Scotland during the week ending with Saturday, January 4, 1902, was 750, being at the annual rate of 23.2 per thousand of estimated population. This rate is 4.3 above that for the corresponding week of last year, and 0.6 above that for the previous week.

The rate of mortality was lowest in Leith, viz., 14.6 per thousand; and highest in Greenock, viz., 27.2 per thousand.

From the seven principal Epidemic or Zymotic Diseases 70 deaths were registered, being at the rate of 2.2 per thousand, or 0.5 below that for last week. Measles was the most fatal of these diseases, having caused 30 Deaths, of which 24 occurred in Glasgow, 3 in Dundee, 2 in Greenock and 1 in Paisley.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 182, being 20 above the number for the previous week.

The Mean Temperature was 42°.3, being 7°.8 above that for the week immediately preceding, and 2°.5 above that for the corresponding week of 1901.

## WEEKLY RETURN

OF

 BIRTHS, DEATHS, AND MARRIAGES  
 IN EIGHT PRINCIPAL TOWNS OF  
 SCOTLAND.

By Authority of the Registrar-General.

No. 2.

WEEK ENDING SATURDAY, JANUARY 11, 1902.

The number of Deaths registered in Eight of the Principal Towns of Scotland during the week ending with Saturday, January 11, 1902, was 633, being at the annual rate of 19·6 per thousand of estimated population. This rate is 1·9 below that for the corresponding week of last year, and 3·6 below that for the previous week of the present year.

The lowest rate of mortality was recorded in Perth, viz., 10·9 per thousand; and highest in Greenock, viz., 21·9 per thousand.

From the seven principal Epidemic or Zymotic Diseases 56 deaths were registered, being at the rate of 1·7 per thousand, or 0·5 below that for last week. Of these deaths, 23 were due to Measles, being 7 below the number for the previous week. Nineteen occurred in Glasgow and 4 in Dundee.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 142, being 40 below the number for the previous week.

The Mean Temperature was 43°·3, being 1°·0 above that for the week immediately preceding, and 7°·5 above that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 3. WEEK ENDING SATURDAY, JANUARY 18, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, January 18, 1902, was 673, being at the annual rate of 20·8 per thousand of estimated population. This rate is 2·8 below that for the corresponding week of last year, but 1·2 above that for the previous week of the present year.

The lowest rate of mortality was recorded in Perth, viz., 14·1 per thousand; and the highest in Glasgow, viz., 23·5 per thousand.

From the seven principal Epidemic or Zymotic Diseases 64 deaths were registered, being at the rate of 2·0 per thousand, or 0·3 above that for last week. Measles was the most fatal of these diseases, having caused 23 deaths (the same as the number for the preceding week), of which 20 occurred in Glasgow, 2 in Dundee, and 1 in Greenock.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 175, or 33 above the number for the previous week.

The Mean Temperature was 36°·6, being 6°·7 below that for the week immediately preceding, and 2°·6 below that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 4.

WEEK ENDING SATURDAY, JANUARY 25, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, January 25, 1902, was 656, giving an annual mortality rate of 20·3 per thousand of estimated population. This rate is 0·5 below that for the corresponding week of last year, and also 0·5 below that for the previous week of the present year.

The lowest rate of mortality was recorded in Leith, viz., 11·2 per thousand; and the highest in Glasgow, viz., 22·1 per thousand.

From the seven most familiar Epidemic or Zymotic Diseases 78 deaths were registered, being at the rate of 2·4 per thousand, or 0·4 above that for last week. Measles was the most fatal of these diseases, having caused 31 deaths (an increase of 8 over the number for each of the two preceding weeks), of which 23 occurred in Glasgow, and 6 in Dundee.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 127, being 48 below the number for the previous week.

The Mean Temperature was 42°·4, being 5°·8 above that for the week immediately preceding, and 1°·9 above that for the corresponding week of 1901.

WEEKLY RETURN  
OF  
BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 5.

WEEK ENDING SATURDAY, FEBRUARY 1, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, February 1, 1902, was 704, being at the annual rate of 21.8 per thousand of estimated population. This rate is the same as that for the corresponding week of last year, but 1.5 above that for the previous week of the present year.

The lowest rate of mortality was recorded in Perth, viz., 10.9 per thousand; and the highest in Glasgow, viz., 23.2 per thousand.

From the seven most familiar Epidemic or Zymotic Diseases 66 deaths were registered, being at the rate of 2.0 per thousand, or 0.4 below that for last week. Measles was the most fatal of these diseases, having caused 23 deaths (being 8 less than the number for the previous week), of which 16 occurred in Glasgow and 5 in Dundee. Nineteen deaths were due to Hooping-cough, and 1 (in Glasgow) to Small-pox.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 138, being 11 above the number for the previous week.

The Mean Temperature was 27°.8, being 14°.6 below that for the week immediately preceding, and 6°.9 below that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 6.

WEEK ENDING SATURDAY, FEBRUARY 8, 1902.

The Deaths registered in Eight of the Principal Towns during the week ending with Saturday, February 8, 1902, amounted to 771, being at the annual rate of 23·9 per thousand of estimated population. This rate is 1·1 above that for the corresponding week of last year, and 2·1 above that for the previous week of the present year.

The lowest death-rate was recorded in Leith, viz., 20·5 per thousand; and the highest in Greenock, viz., 26·5 per thousand.

From the seven principal Epidemic or Zymotic Diseases 83 deaths were registered, being at the rate of 2·6 per thousand, or 0·6 above that for last week. Of these deaths, 23 were due to Diarrhoea, 19 to Measles (of which 16 occurred in Glasgow), and 17 to Hooping-cough. One death from Small-pox was recorded in Glasgow, the same as in the preceding week.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 171, being 33 above the number for the previous week.

The Mean Temperature was 34°·2, being 6°·4 above that for the week immediately preceding, but 1°·9 below that for the corresponding week of 1901.

## W E E K L Y R E T U R N

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 7.

WEEK ENDING SATURDAY, FEBRUARY 15, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, February 15, 1902, was 761, being at the annual rate of 23·6 per thousand of estimated population. This rate is 1·3 above that for the corresponding week of last year, but 0·3 below that for the previous week of the present year.

The lowest rate of mortality was recorded in Perth, viz., 12·5 per thousand; and the highest in Glasgow, viz., 25·2 per thousand.

From the seven principal Epidemic or Zymotic Diseases 66 deaths were registered, being at the rate of 2·0 per thousand, or 0·6 below that for last week. Of these deaths, 20 were due to Hooping-cough, 16 to Diarrhoea, and 12 to Measles. Two deaths from Small-pox were recorded in Glasgow, there having been one in each of the two preceding weeks.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 210, being 39 above the number for the previous week.

The Mean Temperature was 30°·5, being 3°·7 below that for the week immediately preceding, and also 3°·7 below that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 8.

WEEK ENDING SATURDAY, FEBRUARY 22, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, February 22, 1902, was 817, being at the annual rate of 25.3 per thousand of estimated population. This rate is 2.0 above that for the corresponding week of last year, and 1.7 above that for the previous week of the present year.

The lowest rate of mortality was recorded in Edinburgh, viz., 22.1 per thousand; and the highest in Greenock, viz., 37.1 per thousand.

From the seven most familiar Epidemic (Zymotic) Diseases 81 deaths were registered, being at the rate of 2.5 per thousand, or 0.5 above that for last week. Of these deaths, 22 were due to Diarrhoea, 20 to Hooping-cough, 17 to Measles, 6 each to Diphtheria and Fevers, and 7 to Small-pox, of which 6 occurred in Glasgow and 1 in Perth.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 221, being 11 above the number for the previous week.

The Mean Temperature was 35°.6, being 5°.1 above that for the week immediately preceding, but 2°.5 below that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 9.

WEEK ENDING SATURDAY, MARCH 1, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, March 1, 1902, was 729, giving an annual mortality rate of 22·6 per thousand of estimated population. This rate is 1·5 below that for the corresponding week of last year, and 2·7 below that for the previous week of the present year.

The lowest death-rate was recorded in Paisley, viz., 17·3 per thousand; and the highest in Dundee, viz., 26·3 per thousand.

From the seven principal Epidemic Diseases 75 deaths were registered, being at the rate of 2·3 per thousand, or 0·2 below that for last week. Of these deaths, 23 were due to Hooping-cough, 19 to Measles, 13 to Diarrhoea, and 10 to Small-pox, all of the last mentioned having occurred in Glasgow.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 210, being 11 below the number for the previous week.

The Mean Temperature was 40°·5, being 4°·9 above that for the week immediately preceding, and 0°·5 above that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 10.

WEEK ENDING SATURDAY, MARCH 8, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, March 8, 1902, was 820, being at the annual rate of 25·4 per thousand of estimated population. This rate is 2·4 above that for the corresponding week of last year, and 2·8 above that for the previous week of the present year.

The lowest rate of mortality occurred in Perth, viz., 15·6 per thousand; and the highest in Dundee, viz., 29·8 per thousand.

The seven principal Epidemic Diseases accounted for 69 deaths, being at the rate of 2·1 per thousand of population, or 0·2 below that for the preceding week. Of these deaths, 20 were due to Hooping-cough, 17 to Diarrhoea, 14 to Measles, and 2 (in Glasgow) to Small-pox.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 229, showing an increase of 19 over the number for the previous week.

The Mean Temperature was 45°·3, being 4°·8 above that for the week immediately preceding, and 4°·1 above that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 11.

WEEK ENDING SATURDAY, MARCH 15, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, March 15, 1902, was 763, being at the rate of 23·6 deaths per thousand persons of the estimated population per annum. This rate is 1·2 above that for the corresponding week of last year, but 1·8 below that for the previous week of the present year.

The highest rate of mortality was recorded in Greenock, viz., 34·0 per thousand; and the lowest in Paisley, viz., 17·3 per thousand.

From the seven principal Epidemic Diseases 85 deaths were registered, being at the rate of 2·6 per thousand of population, or 0·5 above that for last week. Of these deaths, Hooping-cough and Diarrhoea each accounted for 23, Measles for 14, and Small-pox for 7 (in Glasgow). During the preceding week 2 deaths from Small-pox were recorded in Glasgow.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 186, being 43 below the number for the previous week.

The Mean Temperature was 43°·8, being 1°·5 below that for the week immediately preceding, and 0°·4 below that for the corresponding week of 1901.

## W E E K L Y R E T U R N

OF,

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 12.

WEEK ENDING SATURDAY, MARCH 22, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, March 22, 1902, was 767, giving an annual mortality rate of 23·7 per thousand of the estimated population. This rate is 2·9 above that for the corresponding week of last year, and 0·1 above that for the previous week of the present year.

The lowest death-rate occurred in Perth, viz., 12·5 per thousand; and the highest in Paisley, viz., 26·3 per thousand.

From the seven principal Epidemic Diseases 83 deaths were registered, being at the rate of 2·6 per thousand of population, the same rate as recorded for the previous week. Of these deaths, 28 were due to Hooping-cough, 25 to Diarrhoea, and 11 to Measles. Six deaths from Small-pox were recorded in Glasgow, being one less than the number for the preceding week.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 213, being 27 above the number for the previous week.

The Mean Temperature was 43°·7 being 0°·1 below that for the week immediately preceding, but 4°·0 above that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 13.

WEEK ENDING SATURDAY, MARCH 29, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, March 29, 1902, was 655, being at the annual rate of 20·3 per thousand of the estimated population. This rate is 1·0 below that for the corresponding week of last year, and 3·4 below that for the previous week of the present year.

The lowest rate of mortality was recorded in Edinburgh, viz., 12·1 per thousand; and the highest in Aberdeen, viz., 28·4 per thousand.

From the seven most familiar Epidemic Diseases 59 deaths were registered, being at the rate of 1·8 per thousand of population, or 0·8 below that for last week. Of these deaths, 22 were due to Diarrhoea, 14 to Measles (of which 12 occurred in Glasgow), and 13 to Hooping-cough.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 173, being 40 below the number for the previous week.

The Mean Temperature was 39°·6, being 4°·1 below that for the week immediately preceding, but 5°·8 above that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 14.

WEEK ENDING SATURDAY, APRIL 5, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, April 5, 1902, was 687, being at the annual rate of 21.3 per thousand of the estimated population. This rate is 2.5 below that for the corresponding week of last year, but 1.0 above that for the previous week of the present year.

The death-rate for the week was lowest in Paisley, viz., 16.0 per thousand; and highest in Greenock, viz., 26.5 per thousand.

From the seven principal Epidemic Diseases 59 deaths were registered, giving a rate of 1.8 per thousand of population, the same as that for the previous week. Of these deaths, 15 were due to Diarrhoea, 14 to Hooping-cough, and 11 to Measles. Two deaths from Small-pox were recorded in Glasgow.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 159, being 14 below the number for the previous week.

The Mean Temperature was 41.6, being 2.0 above that for the week immediately preceding, and 1.3 above that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 15.

WEEK ENDING SATURDAY, APRIL 12, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, April 12, 1902, was 715, giving an annual mortality rate of 22·1 per thousand of the estimated population. This rate is 0·7 below that for the corresponding week of last year, but 0·8 above that for the previous week of the present year.

The lowest rate of mortality occurred in Leith, viz., 13·9 per thousand; and the highest in Greenock, viz., 26·5 per thousand.

From the seven principal Epidemic Diseases 56 deaths were registered, being at the rate of 1·7 per thousand of population, or 0·1 below that for last week. Hooping-cough was the most fatal of these diseases, having caused 21 deaths, of which 8 occurred in Aberdeen. Measles caused 10 deaths, Scarlet Fever and Diarrhoea each 8, and Small-pox in Glasgow, 2, being the same number as for the previous week.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 187, being 28 above the number for the previous week.

The total deaths from Violence during the week were 52, of which 35 occurred in Glasgow, many of these resulting from the accident at the football match on the 5th instant at Ibrox Football Field.

The Mean Temperature was 40°·3, being 1°·3 below that for the week immediately preceding, and 3°·3 below that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 16.

WEEK ENDING SATURDAY, APRIL 19, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, April 19, 1902, was 795, being at the annual rate of 24·6 per thousand of the estimated population. This rate is 1·9 above that for the corresponding week of last year, and 2·5 above that for the previous week of the present year.

The lowest rate of mortality was recorded in Paisley, viz., 19·9 per thousand; and the highest in Greenock, viz., 34·0 per thousand.

From the seven principal Epidemic Diseases 63 deaths were registered, being at the rate of 2·0 per thousand of population, or 0·3 above that for last week. Of these deaths 21 were due to Hooping-cough, of which 8 occurred in Aberdeen; 18 to Measles, of which 6 occurred in Glasgow, 5 in Edinburgh, and 4 in Perth; 7 to Diphtheria, of which 2 occurred in Leith; and 1 from Small-pox, in Glasgow.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 197, being 10 above the number for the previous week.

The Mean Temperature was 45°·9, being 5°·6 above that for the week immediately preceding, and 0°·4 above that for the corresponding week of 1901.

TABLE III.—DEATHS and RATE OF MORTALITY in Eight Principal Towns during the Week ending Saturday, April 20, 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 17.

WEEK ENDING SATURDAY, APRIL 26, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, April 26, 1902, was 682, being at the annual rate of 21·1 per thousand of the estimated population. This rate is 1·4 below that for the corresponding week of last year, and 3·5 below that for the previous week of the present year.

The lowest rate of mortality occurred in Perth, *viz.*, 17·2 per thousand; and the highest in Greenock, *viz.*, 23·4 per thousand.

From the seven principal Epidemic Diseases 70 deaths were registered, being at the rate of 2·2 per thousand of population, or 0·2 above that for last week. Of these deaths 29 were due to Hooping-cough, of which 10 occurred in Aberdeen; 13 to Measles, of which 4 occurred in Dundee, 3 in Paisley, and 3 in Perth; 4 to Diphtheria, all of which occurred in Glasgow; and 1 to Small-pox, in Glasgow, being the same number as for the previous week.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 160, being 37 below the number for the previous week.

The Mean Temperature was 50°·2, being 4°·3 above that for the week immediately preceding, but 1°·0 below that for the corresponding week of 1901.

## W E E K L Y R E T U R N

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 18.

WEEK ENDING SATURDAY, MAY 3, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, May 3, 1902, was 612, being at the annual rate of 18·9 per thousand of the estimated population. This rate is 2·0 below that for the corresponding week of last year, and 2·2 below that for the previous week of the present year.

The lowest rate of mortality was recorded in Edinburgh and Aberdeen, *viz.*, 15·8 per thousand; and the highest in Greenock, *viz.*, 23·4 per thousand.

From the seven principal Epidemic Diseases 78 deaths were registered, being at the rate of 2·4 per thousand of population, or 0·2 above that for last week. Of these deaths 28 were due to Hooping-cough, of which 16 occurred in Glasgow and 6 in Aberdeen; 23 to Diarrhoea; 15 to Measles, of which 5 occurred in Edinburgh and the same number in Dundee; 4 to Diphtheria, and 1 to Smallpox, in Glasgow, being the same number as for the preceding week.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 137, being 23 below the number for the previous week.

The Mean Temperature was 45°·3, being 4°·9 below that for the week immediately preceding, and also 4°·9 below that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 20.

WEEK ENDING SATURDAY, MAY 17, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, May 17, 1902, was 628, being at the annual rate of 19·4 per thousand of the estimated population. This rate is 0·5 below that for the corresponding week of last year, but 1·3 above that for the previous week of the present year.

The lowest death-rate occurred in Leith, viz., 11·2 per thousand; and the highest in Perth, viz., 25·0 per thousand.

From the seven principal Epidemic Diseases 74 deaths were registered, being at the rate of 2·3 per thousand of population, or 0·9 above that for last week. Of these deaths 25 were due to Hooping-cough, of which 10 occurred in Glasgow, 5 in Edinburgh, and 7 in Aberdeen; 21 to Measles, of which 6 occurred in Edinburgh, 5 in Paisley, and 3 in Perth; and 19 to Diarrhoea.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 112, being the same number as for the previous week.

The Mean Temperature was 44°·0, being 0°·4 above that for the week immediately preceding, but 7°·9 below that for the corresponding week of 1901.

No. 21.

WEEK ENDING SATURDAY, MAY 24, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, May 24, 1902, was 656, being at the annual rate of 20·3 per thousand of the estimated population. This rate is 0·4 below that for the corresponding week of last year, but 0·9 above that for the previous week of the present year.

The lowest death-rate occurred in Leith, viz., 9·3 per thousand; and the highest in Glasgow, viz., 22·5 per thousand.

From the seven most familiar Epidemic Diseases 55 deaths were registered, being at the rate of 1·7 per thousand of population, or 0·6 below that for last week. Of these deaths 16 were due to Measles, of which 5 occurred in Edinburgh, and 3 each in Dundee, Paisley, and Perth; 14 to Hooping-cough; 14 to Diarrhoea; and 1 to Small-pox in Glasgow, there having been none for the two preceding weeks.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 155, being 43 above the number for the previous week.

The Mean Temperature was 49°·0, being 5°·0 above that for the week immediately preceding, but 5°·7 below that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 22.

WEEK ENDING SATURDAY, MAY 31, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, May 31, 1902, was 624, giving an annual mortality rate of 19.3 per thousand of the estimated population. This rate is 0.8 below that for the corresponding week of last year, and 1.0 below that for the previous week of the present year.

The lowest rate of mortality was recorded in Leith, viz., 15.2 per thousand; and the highest in Perth, viz., 25.0 per thousand.

From the seven principal Epidemic Diseases 57 deaths were registered, being at the rate of 1.8 per thousand of population, or 0.1 above that for last week. Of these deaths 22 were due to Hooping-cough, of which 14 occurred in Glasgow; 15 to Diarrhoea; 13 to Measles; and 4 to Diphtheria, of which 3 occurred in Edinburgh.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 127, being 28 below the number for the previous week.

The Mean Temperature was 50°.0, being 1°.0 above that for the week immediately preceding, but 5°.8 below that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 23.

WEEK ENDING SATURDAY, JUNE 7, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, June 7, 1902, was 623, being at the annual rate of 19.3 per thousand of the estimated population. This rate is 0.3 below that for the corresponding week of last year, and the same as that for the previous week of the present year.

The lowest death rate occurred in Leith, viz., 10.6 per thousand; and the highest in Paisley, viz., 27.5 per thousand.

From the seven principal Epidemic Diseases 61 deaths were registered, being at the rate of 1.9 per thousand of population, or 0.1 above that for last week. Of these deaths 22 were due to Measles, of which 7 occurred in Paisley, 7 in Glasgow, and 4 in Edinburgh; 16 to Diarrhoea, of which 6 occurred in Dundee; and 15 to Hooping-cough, of which 13 were in Glasgow.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 115, being 12 below the number for the previous week.

The Mean Temperature was 52.1°, being 2.1° above that for the week immediately preceding, but 5°.0 below that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 24.

WEEK ENDING SATURDAY, JUNE 14, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, June 14, 1902, was 614, being at the annual rate of 19.0 per thousand of the estimated population. This rate is 2.1 above that for the corresponding week of last year, but 0.3 below that for the previous week of the present year.

The lowest death rate occurred in Leith, viz., 13.9 per thousand; and the highest in Dundee, viz., 20.5 per thousand.

From the seven principal Epidemic Diseases 68 deaths were registered, being at the rate of 2.1 per thousand of population, or 0.2 above that for last week. Of these deaths 21 were due to Hooping-cough, of which 13 occurred in Glasgow; and 18 each to Measles and Diarrhoea.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 126, being 11 above the number for the previous week. Three deaths from Croup occurred in Glasgow.

The Mean Temperature was 49°4, being 2.7 below that for the week immediately preceding, and 2.5 below that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 25.

WEEK ENDING SATURDAY, JUNE 21, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, June 21, 1902, was 531, being at the annual rate of 16·4 per thousand of the estimated population. This rate is 2·2 below that for the corresponding week of last year, and 2·6 below that for the previous week of the present year.

The lowest rate of mortality occurred in Leith, viz., 12·6 per thousand; and the highest in Paisley, viz., 19·2 per thousand.

From the seven principal Epidemic Diseases 55 deaths were registered, being at the rate of 1·7 per thousand of population, or 0·4 below that for last week. Measles was the most fatal of these diseases, having caused 18 deaths, of which 7 occurred in Glasgow, 4 each in Edinburgh and Paisley, 1 in Leith, and 2 in Perth. Diarrhoea caused 17 deaths, and Hooping-cough 13.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 95, being 31 below the number for the previous week.

The Mean Temperature was 50°·7, being 1°·3 above that for the week immediately preceding, but 4°·3 below that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 26.

WEEK ENDING SATURDAY, JUNE 28, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, June 28, 1902, was 620, being at the annual rate of 19.2 per thousand of the estimated population. This rate is 1.9 above that for the corresponding week of last year, and 2.8 above that for the previous week of the present year.

The lowest rate of mortality was recorded in Leith, viz., 15.9 per thousand; and the highest in Perth, viz., 29.7 per thousand.

From the seven principal Epidemic Diseases 57 deaths were registered, being at the rate of 1.8 per thousand of population, or 0.1 above that for last week. Of these deaths 16 were due to Diarrhoea, of which 7 occurred in Glasgow, and 4 each in Edinburgh and Aberdeen; 15 to Measles, of which 6 occurred in Edinburgh, and 3 in Paisley; and 14 to Hooping-cough, of which 4 occurred in Edinburgh, and 2 each in Aberdeen, Paisley, and Perth.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 100, being 5 above the number for the previous week.

The Mean Temperature was 59°.8, being 9°.1 above that for the week immediately preceding, and 2°.6 above that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 27.

WEEK ENDING SATURDAY, JULY 5, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, July 5, 1902, was 528, equivalent to an annual mortality rate of 16.3 per thousand of the estimated population. This rate is 2.7 below that for the corresponding week of last year, and 2.9 below that for the previous week of the present year.

The lowest rate of mortality was recorded in Perth, viz., 7.8 per thousand; and the highest in Dundee, viz., 18.0 per thousand.

From the seven most familiar Epidemic Diseases 66 deaths were registered, being at the rate of 2.0 per thousand of population, or 0.2 above that for last week. Of these deaths 24 were due to Diarrhoea, of which 13 occurred in Glasgow and 4 in Dundee; 16 to Hooping-cough, of which 10 occurred in Glasgow; and 13 to Measles, of which 6 occurred in Edinburgh and 3 in Paisley.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 86, being 14 below the number for the previous week.

The Mean Temperature was 57.9, being 1.9 below that for the week immediately preceding, and 0.5 below that for the corresponding week of 1901.

## W E E K L Y R E T U R N

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 28.

WEEK ENDING SATURDAY, JULY 12, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, July 12, 1902, was 523, representing an annual mortality rate of 16·2 per thousand of the estimated population. This rate is 1·0 below that for the corresponding week of last year, and 0·1 below that for the previous week of the present year.

The lowest death-rate occurred in Aberdeen, *viz.*, 13·5 per thousand; and the highest in Paisley, *viz.*, 19·2 per thousand.

From the seven principal Epidemic Diseases 62 deaths were registered, being at the annual rate of 1·9 per thousand of population, or 0·1 below that for last week. Measles was the most fatal of these diseases, having caused 22 deaths, of which 12 occurred in Edinburgh and 3 in Paisley. Fifteen deaths were due to Diarrhoea and 14 to Hooping-cough, 6 of the latter having occurred in Edinburgh, and 3 in Aberdeen.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 74, being 12 below the number for the previous week.

The Mean Temperature was 56°·5, being 1°·4 below that for the week immediately preceding, and 6°·8 below that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 30.

WEEK ENDING SATURDAY, JULY 26, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, July 26, 1902, was 512, equivalent to an annual mortality rate of 15·8 per thousand of the estimated population. This rate is 2·0 below that for the corresponding week of last year, but 1·1 above that for the previous week of the present year.

The lowest rate of mortality was recorded in Paisley, viz., 8·3 per thousand; and the highest in Glasgow, viz., 18·1 per thousand.

From the seven principal Epidemic Diseases 57 deaths were registered, being at the annual rate of 1·8 per thousand of population, or 0·4 above that for last week. Of these deaths 21 were due to Diarrhoea, of which 13 occurred in Glasgow, and 6 in Dundee; 13 to Hooping-cough; and 10 to Measles, of which 7 occurred in Edinburgh.

The Deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 79, being 17 above the number for the previous week.

The Mean Temperature was 52°·5, being 5°·7 below that for the week immediately preceding, and 9°·6 below that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 31.

WEEK ENDING SATURDAY, AUGUST 2, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, August 2, 1902, was 535, representing an annual mortality rate of 16·6 per thousand of the estimated population. This rate is 3·2 below that for the corresponding week of last year, but 0·8 above that for the previous week of the present year.

The lowest death-rate was recorded in Leith, viz., 9·9 per thousand; and the highest in Dundee, viz., 18·9 per thousand.

From the seven principal Epidemic diseases 48 deaths were registered, being at the annual rate of 1·5 per thousand of population, or 0·3 below that for last week. Of these deaths 19 were due to Diarrhoea, of which 9 occurred in Glasgow, and 6 in Dundee; and 12 to Measles, of which 8 occurred in Edinburgh.

The deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 79, being the same as the number for the previous week.

The Mean Temperature was 55°0, being 2°5 above that for the week immediately preceding, but 6°9 below that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 32.

WEEK ENDING SATURDAY, AUGUST 9, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, August 9, 1902, was 449, representing an annual mortality rate of 13·9 per thousand of the estimated population. This rate is 5·3 below that for the corresponding week of last year, and 2·7 below that for the previous week of the present year.

The lowest death-rate was recorded in Paisley, viz., 12·2 per thousand; and the highest in Greenock viz., 18·9 per thousand.

From the seven principal Epidemic diseases 46 deaths were registered, being at the annual rate of 1·4 per thousand of population, or 0·1 below that for last week. Of these deaths 16 were due to Hooping-cough, of which 9 occurred in Glasgow, and 2 each in Edinburgh, Paisley, and Leith; 16 to Diarrhoea; and 5 to Measles, of which 3 occurred in Edinburgh.

The deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 61, being 18 below the number for the previous week.

The Mean Temperature was 54°·2, being 0°·8 below that for the week immediately preceding, and 5°·2 below that for the corresponding week of 1901.

## W E E K L Y R E T U R N

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 33.

WEEK ENDING SATURDAY, AUGUST 16, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, August 16, 1902, was 507, representing an annual mortality rate of 15.7 per thousand of the estimated population. This rate is 3.3 below that for the corresponding week of last year, but 1.8 above that for the previous week of the present year.

The lowest rate of mortality was recorded in Leith, viz., 11.9 per thousand; and the highest in Greenock, viz., 21.2 per thousand.

From the seven principal Epidemic diseases 65 deaths were registered, being at the annual rate of 2.0 per thousand of population, or 0.6 above that for last week. Of these deaths 25 were due to Hooping-cough, of which 14 occurred in Glasgow, 5 in Aberdeen, and 2 each in Edinburgh, Dundee, and Leith; 9 to Measles, of which 5 occurred in Paisley; and 23 to Diarrhoea, the number for the corresponding week of last year having been 111.

The deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 72, being 11 above the number for the previous week.

The Mean Temperature was 55°.0, being 0°.8 above that for the week immediately preceding, but 3°.8 below that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 34.

WEEK ENDING SATURDAY, AUGUST 23, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, August 23, 1902, was 464, being at the annual rate of 14·4 per thousand of the estimated population. This rate is 3·4 below that for the corresponding week of last year, and 1·3 below that for the previous week of the present year.

The lowest death-rate was recorded in Leith, viz., 4·6 per thousand; and the highest in Paisley, viz., 17·3 per thousand.

From the seven principal Epidemic diseases 52 deaths were registered, being at the rate of 1·6 per thousand of population, or 0·4 below that for last week. Of these deaths 5 were due to Measles, 7 to Scarlet Fever, 14 to Hooping-cough, and 22 to Diarrhoea. In the corresponding week of last year, 92 deaths were caused by Diarrhoea.

The deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 67, being 5 less than the number for the previous week.

The Mean Temperature was 55°·6, being 0°·6 above that for the week immediately preceding, but 3°·8 below that for the corresponding week of 1901.

## W E E K L Y R E T U R N

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 35.

WEEK ENDING SATURDAY, AUGUST 30, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, August 30, 1902, was 451, representing an annual mortality-rate of 14·0 per thousand of the estimated population. This rate is 3·4 below that for the corresponding week of last year, and 0·4 below that for the previous week of the present year.

The lowest rate of mortality was recorded in Leith, viz., 7·9 per thousand; and the highest in Perth, viz., 26·6 per thousand.

From the seven principal Epidemic diseases 45 deaths were registered, being at the rate of 1·4 per thousand of population, or 0·2 below that for last week. Of these deaths 17 were due to Hooping-cough, and 14 to Diarrhoeal diseases. During the corresponding week of last year, the deaths from Diarrhoea amounted to 81.

From Bronchitis, Pneumonia, and Pleurisy 54 deaths resulted, being 13 below the number for the previous week.

The Mean Temperature was 56°·6, being 1°·0 above that for the week immediately preceding, and 0°·4 above that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 36.

WEEK ENDING SATURDAY, SEPTEMBER 6, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, September 6, 1902, was 448, being at the annual rate of 13·9 per thousand of the estimated population. This rate is 3·9 below that for the corresponding week of last year, and 0·1 below that for the previous week of the present year.

The lowest rate of mortality was recorded in Leith, *viz.*, 5·3 per thousand; and the highest in Glasgow, *viz.*, 16·5 per thousand.

From the seven principal Epidemic diseases 54 deaths were registered, being at the rate of 1·7 per thousand of population, or 0·3 above that for last week. Of these deaths 31 were due to Diarrhoeal diseases, of which 20 occurred in Glasgow; 8 to Hooping-cough; and 6 each to Measles and Fever. During the corresponding week of last year, the deaths from Diarrhoea amounted to 77.

From Bronchitis, Pneumonia, and Pleurisy 61 deaths resulted, being 7 above the number for the previous week.

The Mean Temperature was 56°·2, being 0°·4 below that for the week immediately preceding, but 3°·1 above that for the corresponding week of 1901.

No. 37.

WEEK ENDING SATURDAY, SEPTEMBER 13, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, September 13, 1902, was 479, being at the annual rate of 14·8 per thousand of the estimated population. This rate is 2·7 below that for the corresponding week of last year, but 0·9 above that for the previous week of the present year.

The lowest rate of mortality was recorded in Leith, viz., 6·6 per thousand; and the highest in Paisley, viz., 16·7 per thousand.

From the seven principal Epidemic diseases 52 deaths were registered, being at the rate of 1·6 per thousand of population, or 0·1 below that for last week. Of these deaths 21 were due to Diarrhoeal diseases, 8 to Scarlet Fever, and 7 each to Measles and Hooping-cough.

The deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 82, being 21 above the number for the previous week.

The Mean Temperature was 52°·4, being 3°·8 below that for the week immediately preceding, and 5°·4 below that for the corresponding week of 1901.

## W E E K L Y R E T U R N

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 38.

WEEK ENDING SATURDAY, SEPTEMBER 20, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, September 20, 1902, was 456, representing an annual mortality-rate of 14·1 per thousand of the estimated population. This rate is 2·1 below that for the corresponding week of last year, and 0·7 below that for the previous week of the present year.

The lowest death-rate was recorded in Aberdeen and Perth, viz., 12·5 per thousand; and the highest in Leith, viz., 15·9 per thousand.

From the seven principal Epidemic diseases 43 deaths were registered, being at the rate of 1·3 per thousand of population, or 0·3 below that for last week. Of these deaths 21 were due to Diarrhoeal diseases, and 10 to Hooping-cough. During the corresponding week of last year, the deaths from Diarrhoea amounted to 53.

From Bronchitis, Pneumonia, and Pleurisy 56 deaths resulted, being 26 below the number for the previous week.

The Mean Temperature was 50°·9, being 1°·5 below that for the week immediately preceding, and 3°·5 below that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 39.

WEEK ENDING SATURDAY, SEPTEMBER 27, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, September 27, 1902, was 507, equivalent to an annual mortality-rate of 15·7 per thousand of the estimated population. This rate is 0·3 below that for the corresponding week of last year, but 1·6 above that for the previous week of the present year.

The lowest rate of mortality was recorded in Aberdeen, viz., 12·5 per thousand; and the highest in Greenock, viz., 22·7 per thousand.

From the seven principal Epidemic diseases 48 deaths were recorded, being at the rate of 1·5 per thousand of population, or 0·2 above that for last week. Of these deaths 27 were due to Diarrhoeal diseases, 7 to Hooping-cough, 6 to Enteric Fever, and 5 to Scarlet Fever.

The deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 83, being 27 above the number for the previous week.

The Mean Temperature was 54°·9, being 4°·0 above that for the week immediately preceding, but 2°·8 below that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 40.

WEEK ENDING SATURDAY, OCTOBER 4, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, October 4, 1902, was 536, representing an annual mortality-rate of 16·6 per thousand of the estimated population. This rate is 2·1 above that for the corresponding week of last year, and 0·9 above that for the previous week of the current year.

The lowest rate of mortality was recorded in Leith, viz., 11·2 per thousand; and the highest in Glasgow, viz., 18·5 per thousand.

From the seven principal Epidemic diseases 56 deaths were registered, being at the rate of 1·7 per thousand of population, or 0·2 above that for last week. Of these deaths 31 were caused by Diarrhoeal diseases, 8 by Hooping-cough, 6 each by Scarlet and Enteric Fever, and 4 by Diphtheria.

The deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 87, being 4 above the number for the previous week.

The Mean Temperature was 50°·7, being 4°·2 below that for the week immediately preceding, and 2°·8 below that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 41.

WEEK ENDING SATURDAY, OCTOBER 11, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, October 11, 1902, was 496, representing an annual mortality-rate of 15·4 per thousand of the estimated population. This rate is 0·7 below that for the corresponding week of last year, and 1·2 below that for the previous week of the current year.

The lowest death-rate occurred in Leith, viz., 7·3 per thousand; and the highest in Perth, viz., 29·7 per thousand.

From the seven principal Epidemic diseases 49 deaths were registered, being at the rate of 1·5 per thousand of population, or 0·2 below that for last week. Of these deaths 19 were due to Diarrhoeal diseases, 12 to Hooping-cough, 5 each to Scarlet Fever and Diphtheria, and 4 to Measles.

The deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 103, being an increase of 16 compared with the number for the previous week.

The Mean Temperature was 45°·4, being 5°·3 below that for the week immediately preceding, and 1°·7 below that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 42.

WEEK ENDING SATURDAY, OCTOBER 18, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, October 18, 1902, was 581, being equivalent to an annual mortality-rate of 18·0 per thousand of the estimated population. This rate is 1·1 above that for the corresponding week of last year, and 2·6 above that for the previous week of the present year.

The lowest rate of mortality occurred in Leith, *viz.*, 8·6 per thousand; and the highest in Paisley, *viz.*, 30·1 per thousand.

The seven principal Epidemic diseases accounted for 56 deaths, being at the rate of 1·7 per thousand of population, or 0·2 above that for last week. Of these deaths 24 were due to Diarrhoeal diseases; 11 to Hooping-cough; 8 to Diphtheria, of which 5 occurred in Glasgow and 2 in Greenock; and 8 to Scarlet Fever.

The deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 127, being 24 above the number for the previous week.

The Mean Temperature was 47°·8, being 2°·4 above that for the week immediately preceding, and 0°·9 above that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 43.

WEEK ENDING SATURDAY, OCTOBER 25, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, October 25, 1902, was 543, being equivalent to an annual mortality-rate of 16.8 per thousand of the estimated population. This rate is 2.5 below that for the corresponding week of last year, and 1.2 below that for the previous week of the present year.

The lowest rate of mortality was recorded in Leith, viz., 11.2 per thousand; and the highest in Greenock, viz., 19.7 per thousand.

The seven principal Epidemic diseases accounted for 46 deaths, being at the rate of 1.4 per thousand of population, or 0.3 below that for last week. Of these deaths 21 were due to Diarrhoeal diseases; 10 to Scarlet Fever, of which 3 each occurred in Glasgow and Greenock, 2 in Paisley, and 1 each in Edinburgh and Aberdeen; 7 to Hooping-cough; and 5 to Diphtheria.

From Bronchitis, Pneumonia, and Pleurisy 112 deaths resulted, being 15 less than the mortality from these diseases during the previous week.

The Mean Temperature was 47°.2, being 0°.6 below that for the week immediately preceding, but 3°.9 above that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 44.

WEEK ENDING SATURDAY, NOVEMBER 1, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, November 1, 1902, was 612, being at the annual rate of 18.9 per thousand of the estimated population. This rate is 1.0 below that for the corresponding week of last year, but 2.1 above that for the previous week of the present year.

The lowest rate of mortality was recorded in Perth, viz., 14.1 per thousand; and the highest in Dundee and in Paisley, viz., 19.9 per thousand.

From the seven principal Epidemic diseases 55 deaths were registered, being at the rate of 1.7 per thousand of population, or 0.3 above that for last week. Diarrhoeal diseases accounted for 18 of these deaths, of which 7 occurred in Dundee; Hooping-cough for 16, of which 8 occurred in Glasgow, and 3 in Dundee; Scarlet Fever for 7, of which 4 occurred in Edinburgh; Diphtheria for 6; and Measles for 5.

The deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 144, being 32 above the number for the previous week.

The Mean Temperature was 49°.5, being 2°.3 above that for the week immediately preceding, and 1°.3 above that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 45.

WEEK ENDING SATURDAY, NOVEMBER 8, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, November 8, 1902, was 553, being at the annual rate of 17.1 per thousand of the estimated population. This rate is 4.6 below that for the corresponding week of last year, and 1.8 below that for the previous week of the present year.

The lowest rate of mortality was recorded in Leith, *viz.*, 9.3 per thousand; and the highest in Perth, *viz.*, 28.1 per thousand.

The seven principal Epidemic diseases accounted for 54 deaths, being at the rate of 1.7 per thousand of population, the same as the rate for the previous week. Of these deaths, 21 were due to Diarrhoeal diseases; 18 to Hooping-cough, the mortality from this disease being relatively highest in Perth; 5 to Fevers; and 4 to Scarlet Fever.

The deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 147, being 3 more than the number for the previous week.

The Mean Temperature was 47.3°, being 2.2° below that for the week immediately preceding, but 2.4° above that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 46.

WEEK ENDING SATURDAY, NOVEMBER 15, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, November 15, 1902, was 529, being at the annual rate of 16·4 per thousand of the estimated population. This rate is 3·5 below that for the corresponding week of last year, and 0·7 below that for the previous week of the present year.

The lowest rate of mortality was recorded in Perth, *viz.*, 10·9 per thousand; and the highest in Glasgow, *viz.*, 18·0 per thousand.

The seven principal Epidemic diseases accounted for 41 deaths, being at the rate of 1·3 per thousand of population, or 0·4 below that for the previous week. Of these deaths, 22 were due to Diarrhoeal diseases, 5 to Fever, and 4 each to Diphtheria and Measles.

The deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 136, being 11 below the number for the previous week.

The Mean Temperature was 47°·5, being 0°·2 above that for the week immediately preceding, and 8°·9 above that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 47.

WEEK ENDING SATURDAY, NOVEMBER 22, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, November 22, 1902, was 507, being at the annual rate of 15·7 per thousand of the estimated population. This rate is 5·6 below that for the corresponding week of last year, and 0·7 below that for the previous week of the present year.

The lowest rate of mortality was recorded in Perth, viz., 10·9 per thousand; and the highest in Paisley, viz., 20·5 per thousand.

The seven principal Epidemic diseases accounted for 43 deaths, being at the rate of 1·3 per thousand of population, or the same as that for the previous week. Diarrhoeal diseases caused 20 of these deaths; Hooping-cough, 9; and Scarlet Fever, 8.

The deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 118, being 18 below the number for the previous week.

The Mean Temperature was 40°·3, being 7°·2 below that for the week immediately preceding, and 0°·5 below that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 48.

WEEK ENDING SATURDAY, NOVEMBER 29, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, November 29, 1902, was 646, being at the annual rate of 20·0 per thousand of the estimated population. This rate is 2·2 below that for the corresponding week of last year, but 4·3 above that for the previous week of the present year.

The lowest rate of mortality was recorded in Perth, viz., 12·5 per thousand; and the highest in Paisley, viz., 23·1 per thousand.

From the seven principal Epidemic diseases 59 deaths were registered, being at the rate of 1·8 per thousand of population, or 0·5 above that for the previous week. Diarrhoeal diseases accounted for 20 of these deaths; Hooping-cough for 15, of which 10 occurred in Glasgow; Diphtheria for 7, the mortality from this disease having been relatively highest in Greenock and Aberdeen; Scarlet Fever for 6, the highest rate having occurred in Greenock; and Measles and "Fever" each for 5.

The deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 130, being 12 above the number for the previous week.

The Mean Temperature was 43°·4, being 3°·1 above that for the week immediately preceding, and 2°·0 above that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 49.

WEEK ENDING SATURDAY, DECEMBER 6, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, December 6, 1902, was 599, representing an annual mortality rate of 18·5 per thousand of the estimated population. This rate is 2·0 below that for the corresponding week of last year, and 1·5 below that for the previous week of the present year.

The lowest rate of mortality was recorded in Aberdeen, viz., 14·9 per thousand; and the highest in Dundee, viz., 21·8 per thousand.

From the seven principal Epidemic diseases 64 deaths were recorded, being at the rate of 2·0 per thousand of population, or 0·2 above that for the previous week. Of these deaths 18 were due to Diarrhoeal diseases; 16 to Hooping-cough, of which 11 occurred in Glasgow and 3 in Aberdeen; 10 to Scarlet Fever, from which the mortality was relatively highest in Paisley; and 9 to Diphtheria, of which 7 occurred in Glasgow.

The deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 132, being 2 more than the number for the previous week.

The Mean Temperature was 36°·9, being 6°·5 below that for the week immediately preceding, and 8°·1 below that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 50.

WEEK ENDING SATURDAY, DECEMBER 13, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, December 13, 1902, was 643, being at the annual rate of 19·9 per thousand of the estimated population. This rate is 0·8 below that for the corresponding week of last year, but 1·4 above that for the previous week of the present year.

The lowest rate of mortality was recorded in Greenock, viz., 13·6 per thousand; and the highest in Perth, viz., 23·4 per thousand.

From the seven principal Epidemic diseases 72 deaths were registered, being at the rate of 2·2 per thousand of population, or 0·2 above that for last week. Of these deaths 31 were due to Hooping-cough, of which 20 occurred in Glasgow; 20 to Diarrhoeal diseases; 9 to Diphtheria, of which 6 occurred in Glasgow; and 7 to Measles.

The deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 138, being 6 above the number for the previous week.

The Mean Temperature was 34°·7, being 2°·2 below that for the week immediately preceding, and 0°·1 below that for the corresponding week of 1901.

## WEEKLY RETURN

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 51.

WEEK ENDING SATURDAY, DECEMBER 20, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, December 20, 1902, was 681, being at the annual rate of 21·1 per thousand of the estimated population. This rate is 0·4 below that for the corresponding week of last year, but 1·2 above that for the previous week of the present year.

The lowest rate of mortality occurred in Perth, viz., 15·6 per thousand; and the highest in Dundee, viz., 24·4 per thousand.

From the seven principal Epidemic diseases 68 deaths were registered, being at the rate of 2·1 per thousand of population, or 0·1 below that for last week. Of these deaths 32 were due to Hooping-cough, of which 22 occurred in Glasgow; 15 to Diarrhoeal diseases, of which 6 occurred in Aberdeen; 6 to Scarlet Fever; and 6 to Typhus and Enteric Fever.

The deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 169, being 31 above the number for the previous week.

The Mean Temperature was 44° 0, being 9° 3 above that for the week immediately preceding, and 10° 2 above that for the corresponding week of 1901.

## W E E K L Y R E T U R N

OF

BIRTHS, DEATHS, AND MARRIAGES  
IN EIGHT PRINCIPAL TOWNS OF  
SCOTLAND.

By Authority of the Registrar-General.

No. 52.

WEEK ENDING SATURDAY, DECEMBER 27, 1902.

The number of Deaths registered in Eight of the Principal Towns during the week ending with Saturday, December 27, 1902, was 688, representing an annual mortality rate of 21.3 per thousand of the estimated population. This rate is 1.3 below that for the corresponding week of last year, but 0.2 above that for the previous week of the present year.

The lowest rate of mortality was recorded in Aberdeen, viz., 17.5 per thousand; and the highest in Paisley, viz., 23.7 per thousand.

The seven principal Epidemic diseases accounted for 60 deaths, being at the rate of 1.9 per thousand of population, or 0.2 below that for last week. Of these deaths 20 were due to Hooping-cough, of which 16 occurred in Glasgow; 18 to Diarrhoeal diseases; and 6 each to Measles, Diphtheria, and 'Fever.'

The deaths from Bronchitis, Pneumonia, and Pleurisy amounted to 191, being 22 above the number for the previous week.

The Mean Temperature was 45°.8, being 1°.8 above that for the week immediately preceding, and 11°.3 above that for the corresponding week of 1901.
